NOCOR CERTIFICATES

CE Certificate

CE certification for medical imaging consumables

FSC Free Sale Certificate

Free sale certificate for export medical products

Product Performance Test

Lab test report for film density, stability and imaging per-
performance

Factory Certificate

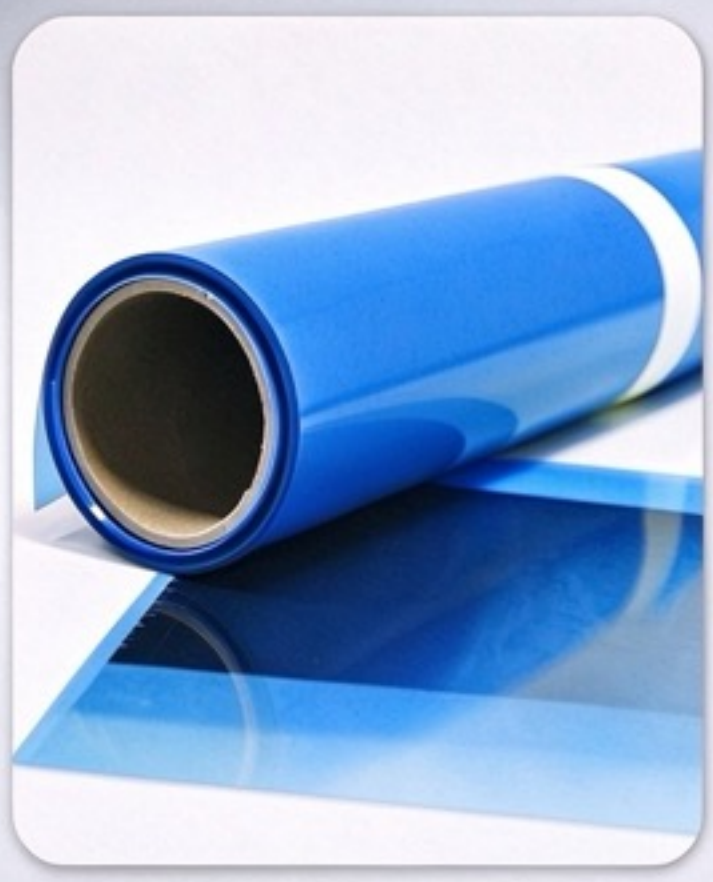

Restriction of hazardous substances control audit compliecrd

NOCOR PRODUCTS

Explore our core product lines for medical imaging & communication solutions

Medical film

Medical printer

DICOM and accessories

Medical film

Medical Imaging Film | High-quality blue base medical film for digital medical imaging

Medical printer

Medical Printer | Stable, high-precision medical imaging printing equipment

DICOM and accessories

DICOM and Accessories | Supporting components for medical imaging and communication systems

MEDICAL FILM

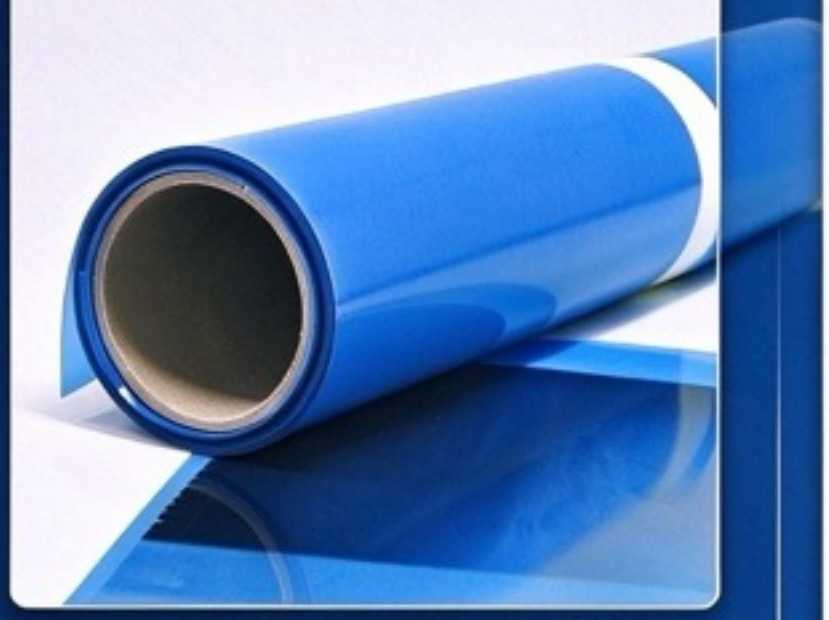

01

NOCOR began PET-based medical imaging film R&D in 2008. With years-long iterative improvement, our dry-process medical film reaches full medical-grade banchmarks in stiff-finess, print sharpness and optical density, delivering comparable performance against con-ventional sllver-halide radiology fim. Built on premium PET substrate paired with our in-house independent coating technology, our portfolio covers inkjet, laser and thermal dry-film variants. This multi-product lineup addresses diverse hardware requirements and budget levels for modern medical imaging workflows.

Medical Inkjet Film #MIF

- **Printing Type:**
- Inkjet Printer
- **Typical Usage:** CT / MRI / DR / DSA
- **Feature:** Low-entry hardware cost, felxible size
- **Best For:** Small-mid clinic, project upgrade

Medical Laser Film #MLF

- **Printing Type:**
- Laser Office Printer
- **Typical Usage:** B-ultrasound, endoscopy medical report output
- **Feature:** Fast output for clinical report
- Ultrasound & endoscopy department

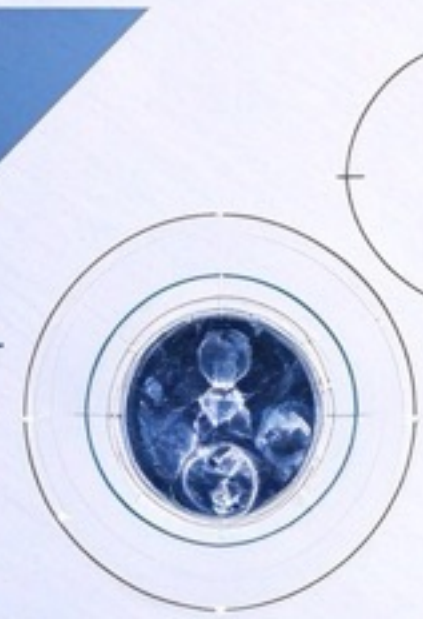

Medical Thermal Film #MTF

- **Printing Type:**
- Thermal Medical Printer
- **Typical Usage:** High-volume radiology department degcment diagnostic film
- **Feature:** High density, daylight-safe handling
- **Best For:** Large-scale hospital hospital radiology room

MEDICAL PRINTER

02

MIP Series Medical Inkjet Printer

An economical printing option for diagnostic films, It pairs seamlessly with our medical imaging film and supports stable DICOM connection for routine radiology, CT, DR and ultranount applications.

MLP Series Medical Laser Printer

Modified from commercial office printers with custom black toner for high-quality film output, It prints an 8×10 film within seconds, Fast and versatile for different departments and imaging projects, it is recognized as a reliable profit driver.

Thermal Medical Printer

Built on Fuji-type thermal imaging technology. Its compact form allows integration into multi-functional combined machines, delivering consistent and stable print quality for medical diagnostic use.

DICOM & ACCESSORIES

03

NOCOM DICOM printing software and related printer spare parts & accessories. Our DICOM solution works seamlessly with iniger medical printers, compatible with mainstream PACS and imaging systems, tegether with reilable replacemont spare parts for MIP and MLP printers.

WHY CHOOSE NOCOR

Direct Factory Supply

Established in 2008, we manufacture medical imaging printers and consumables in-house. Factory direct sales, stable stock and flexible MOQ support long-term distributor partnerships.

Imaging Compliance & Medical Grade

Our products hold **CE** and ISO certification, suitable for CT, MRI, DR and X-Ray.
Strict batch inspection ensures consistent quality for radiology and clinical departments.

Complete Service Support

Custom private label and hospital packaging are supported. Our professional imaging engineers deliver free lifelong remote technical assistance for all clients.
